## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 22-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Rogers (US 2001/0033565 A1).

Rogers discloses a call agent server in which a call agent program maintains a user database for a plurality of LAN telephones (page 7, paragraph 72 through page 9, paragraph 81).

### *Allowable Subject Matter*

3. Claims 1-21 are allowed. Rogers does not teach or fairly suggest the changing of the shared data as being performed by each of the LAN terminals.
